這樣俄烏戰爭還有的打了...歐美經濟要好很難了

現在是普丁企圖藉俄烏戰爭拖垮美元。中俄兩國強推石油人民幣將使俄羅斯擺脫美元的束縛，往中亞、中東、東南亞、拉美、非洲拓展經貿關係，歐洲就看著辦，美國如果還一味抗中，將被晾在一邊。

Tens of Billions of US Dollars Were Transferred to Ukraine and then Using FTX Crypto Currency the Funds Were Laundered Back to Democrats in US

Did you ever wonder where all those billions of dollars were going in Ukraine? Did you ever wonder why anyone was trusting the elites in US politics like the Bidens with billions in funds going to Ukraine?

Today it turns out that these were excellent questions.

We have information that the tens of billions of dollars going to Ukraine were actually laundered back to the US to corrupt Democrats and elites using FTX cryptocurrency. Now the money is gone and FTX is bankrupt.

Earlier today we reported that the FTX cryptocurrency appeared to be used in a ponzi scheme involving the Democrats and Ukraine.

TRENDING: BREAKING EXCLUSIVE: Poll Pads Caught Adding \*Hundreds\* of Voters in Real Time as Poll is Being Closed

As reported earlier, the FTX crypto company gave at least \$40 million to Democrat candidates and causes in the midterms.

Sam Bankman-Fried is Biden's second biggest donor.

In addition to this, Daily Caller lists many of the lawmakers who Sam Bankman Fried was bankrolling who oversaw the institution that was supposed to keep an eye on companies like FTX:

Sam Bankman-Fried, prolific Democratic donor and ex-CEO of now-bankrupt cryptocurrency exchange FTX, funded the campaigns of members of Congress overseeing the Commodity Futures Trading Commission (CFTC), one of the key bodies tasked with regulating the crypto industry and the subject of Bankman-Fried's aggressive lobbying.

Bankman-Fried's FTX is currently under investigation by the CFTC and the Securities and Exchange Commission (SEC) after Bankman-Fried allegedly moved \$10 billion in client assets from

his crypto exchange to his trading firm Alameda Research, and a liquidity crisis at his exchange which prompted the company to file for bankruptcy. However, prior to the agency's probe, Bankman-Fried aggressively courted the CFTC – and funded several key lawmakers charged with overseeing the agency, pouring cash into their campaign coffers.

FTX also happens to be related to Ukraine.

The far-left Washington Post reported on March 3 that Ukraine was dealing in crypto.

The Ukrainian government has gathered more than \$42 million in cryptocurrency donations since Saturday, plus digital artwork including a limited edition worth roughly \$200,000, according to blockchain analytics firm Elliptic. The challenge is how the country cashes in on these assets to fund its war needs.

Amid the Russian invasion of Ukraine, the CEO of FTX, Sam Bankman Fried has come forward to help a crypto donation project. He humbly announced that FTX will be supporting the Ukrainian Ministry of Finance and other communities in collecting crypto donations for the country. The Ukrainian government has received over \$60 million in crypto donations from all over the world.

FTX's CEO, Sam Bankman Fried highlighted that the war in Ukraine has been dragging on. The country is in full need of humanitarian help and access to global financial infrastructure. He also called attention to sanctions and crypto during this kind of situation. He indicated that crypto exchanges should enforce sanctions announced by the government seriously.

FTX has stressed across all of its regulatory and policy efforts, active coordination and communication with regulators and policymakers is crucial to ensuring that laws and rules achieve their intended outcome, reads a letter by FTX

The word is now out. The Democrats sent tens of billions to Ukraine and then laundered this money back to Democrat pockets and funds in the US. Now the company is bankrupt and the funds are nowhere to be found.

This information was shared on Twitter and we can confirm from our sources that this is accurate.

Of course, the Democrats are sending billions to themselves. They steal elections, why wouldn't they steal money?

It Worked Once, Why Not Twice? Here Are Five Ways Democrats are Cheating and Stealing the 2022 Election Like they Did in 2020

In 2020 The Gateway Pundit identified several suspect methods and strategies used by Democrats to steal or alter the presidential election results.

Ballot trafficking in Georgia, late night ballot drops in Detroit, blocking election observers at the TCF Center in 2020.

We spoke out about this suspect or criminal activity for two years. The Gateway Pundit reported exclusively using video footage evidence of the ways the Democrats cheated in the election.

TRENDING: BREAKING EXCLUSIVE: Poll Pads Caught Adding \*Hundreds\* of Voters in Real Time as Poll is Being Closed

The mainstream fake news never once asked us for our video evidence of ballot trafficking and late-night ballot drops. We all know why.

In early October of 2022, The Gateway Pundit posted a list of Seven Steps to take to secure the midterm election.

We later posted a list of 18 questions for the RNC prior to the midterms to secure our elections.

Obviously, not enough was done to prevent the fraud of 2020 from happening in 2022.

Here is a list of incidents we have observed in 2020 and now in the 2022 election. These methods used by Democrats are intentional actions to steal elections.

### 1.) The Drop and Roll

One of the biggest ways they stole the 2020 Election for President was the “The Drop and Roll” method.

In the Drop and Roll incidents in the 2020 Election, we identified that at around the point where 90% of the expected ballots were returned, a large batch of ballots was “dropped” with nearly every ballot going to Joe Biden. These batches were as large as 330,000 ballots for Biden in Virginia at one time.

Then, after that point, nearly all the batches of ballots recorded in the election were at the same ratio of Biden to Trump with Biden always receiving more ballots than President Trump. These results were not random and clearly not legitimate.

The drops were always in favor of the Democrat candidate.

Already this week The Gateway Pundit has seen this method used in Michigan, Minnesota and Georgia.

In Georgia, a runoff is held with the top two candidates if neither candidate exceeds 50% of the vote. This ballot “drop” may have prevented Herschel Walker from winning the election outright with more than 50% of the vote.

The US Senate seat from Georgia may have already been decided before the runoff. This needs to be investigated!

### 2. Training election workers to cheat

In 2020, training sessions were organized and delivered to poll workers in Detroit, Michigan on how to disregard and destroy Republican votes on election day.

This training is now being introduced and is standard training at election training events across the country.

Prior to the 2020 Election audios from election worker training events in Detroit were released. In the audios, a obviously Democratic trainer told election workers to accept provisional ballots when someone says they didn't vote but finds out at the polls that someone else voted for them. The

trainer then instructs the election workers to set their ballots aside, ignore these provisional ballots, and basically get rid of them once the person leaves.

Below is the DetroitLeaks video of the effort by Democrat operatives to steal votes and interfere in the 2020 election in Michigan.

Following the election, Michigan Attorney General Dana Nessel threatened to arrest reporter Shane Trejo if he did not delete his recorded evidence of election fraud in the Detroit area.

Later on a witness in Michigan stepped forward and spoke out about how he witnessed the Detroit election worker training on how to destroy the provisional ballots in Michigan.

Former professor and Attorney David Clements is now warning about this same tactic happening again in 2022 but on a broader playing field. Professor Clements says he is aware of training events where election workers are being taught to give people provisional ballots when they are told that they already voted. This is the same tactic pushed in Detroit in 2020.

### 3.) Stealing the identities of voters to steal their vote

Democrats were stealing the identity of voters in 2020.

And it appears Democrats were also stealing the identity of voters in 2022.

### 4.) Slow-walking results

Democrats are notorious for delaying counting and slow-walking results until they manufacture enough votes to take the lead. Then they shut down the counting. Democrats have been doing this for years.

In 2020 Democrats managed to manufacture a million ballots after election night when President Trump was leading by almost 800,000 votes. This was quite a feat!

Today liberal officials are slow-walking the results in Arizona and Nevada.

### 5.) Late-night ballot drops caught on video.

In 2020 there were two mysterious late night ballot drops of over 75 boxes of ballots in Detroit's TCF Center.

In 2022 they did it again.

This is a partial list. We will be adding to it in the coming days.

BRAZIL – Another Victim of Election Fraud Technique Known as the “Drop and Roll”

TGP first reported on the “Drop and Roll” after the 2020 Presidential Election. Now it looks like Brazil is a victim of this type of election theft as well.

The election in Brazil is very similar to the 2020 Presidential Election in the US. Like President Trump in 2020, the conservative candidate Bolsonaro’s party picked up numerous lower house seats and governorships across the country. It was a conservative wave with the exception of the Presidential race.

In both races, the conservatives were ahead and then the socialist candidate somehow pulled out the win.

Steve Bannon interviewed Mathew Tyrmand on the Brazil election yesterday. During their discussion, Tyrmand noted the following:

TRENDING: BREAKING EXCLUSIVE: Poll Pads Caught Adding \*Hundreds\* of Voters in Real Time as Poll is Being Closed

Bolsonaro’s party dominated the election and with the other conservative parties, and they will dominate the lower House in Brazil.

Bolsonaro was winning the election up to a certain point and then every ballot drop was won by the socialist candidate. “The math doesn’t make sense at all.” Mathew Tyrmand shared.

The Mainstream Media immediately called the election for the socialist.

When speaking about events before the election Tyrmand noted, “There’s been no transparency. There’s been censorship. There’s been arrests of opposition. There’s been penalization from the court to Bolsonaro’s party.”

The election in Brazil is very similar to the US election of 2020.

In Brazil, the election results were consistent for the socialists after a particular point in time. This is what we referred to as the “roll” in the 2020 Election.

In 2020, President Trump was ahead all night in the key swing states by large margins, then in the middle of the night, there were huge ballot drops for Biden only. Hundreds of thousands of Biden ballots were dropped which we referred to as the “drop”. And then after that nearly every ballot batch recorded had the same ratio of Biden to Trump votes with Biden always receiving the same percent more than Trump (i.e. 51% to 49%).

In Brazil, it looks like the large ballot drops didn't occur but the roll was in play for much of the election until the socialist suddenly pulled off the win.

The US is not the only victim of election fraud.

作弊比較嚴重的主要是在搖擺州。這次郵寄選票超過4000萬張，2020民主黨以新冠疫情為由將「郵寄投票」常態化（以前只有駐外美軍和特殊情況才能使用郵寄選票）

史上只有2020和2022選舉開票要開一個禮拜以上，關鍵州暫停開票數天，開票%沒變過（如Arizona的Lake vs Hobbs一直停在93%），科技這麼進步為什麼卻開這麼久？因為額外生出“有效的”郵寄選票需要時間（填寫選票、蓋郵戳、運送到各投票所的時間）。美國人投票前都要先上網登記，所以各州縣市都知道誰沒投票、誰投了票。郵寄選票的好處是可以在投票日之後產生出新選票，以沒有投票的人和投票當日去現場但沒投票成功的人之名投出郵寄選票。

PA州法官允許計算 11 月 14 日之前收到的選票、Maricopa縣官方前幾天宣布已在凌晨開始計票，在剩餘時間裡每小時至少可以計票 3 票。

選民拍攝的證據影片很多，複製貼上幾個案例給您參考：

因工作群組有老外，最近常討論期中選舉之事。當然不可否認您說的也可能是原因!

美國執政黨灑錢，川普做，拜登也做，只是川普被病毒打敗，但這次期中選舉，共和黨拿回眾院，卻輸了參院，說明川普的紅潮對選票沒有實質的影響力，或許，若沒有紅潮，共和黨可能拿下參眾兩院。

11/13 独家：亚利桑那州机器制表器故障的原因——选票大于打印机参数——故意为之？

亚利桑那州30%的机器制表器大规模故障的原因被确定，这一行动不成比例地影响了共和党人的票数，并确保计数的延迟。

技术专家Dan Sundin解释了亚利桑那州30%的制表器无法在选举日处理大多数共和党选票的可能原因。在2022年大选期间制定了选举计划，以处理20英寸的长选票。这与2020年普遍使用的选票相比，初选票长19英寸——短了一英寸。因此，当亚利桑那州选举官员表示他们不知道11月8日发生了什么，一切都与往常相同时，谎言显而易见。

选票的大小不一样为什么这很重要？Maricopa县发布的选票样本pdf和用于邮寄投票的Runbeck打印选票在2022年初选中都正确地制作为20英寸。因此处理倾向于民主党的邮寄选票没有问题。然而用于亲自投票的按需投票打印机只有19英寸的托盘，其中包含19英寸的选票。这意味着对于亲自投票者的官方选票图像必须压缩，以适合打印更小的纸张。压缩使墨水比应该的要轻一点，从而影响制表器阅读选票的方式。Maricopa县指示一些投票中心增加印刷的黑暗程度，这在一定程度上帮助了这个问题。

更大的问题是，压缩图像扭曲了椭圆形最终出现在纸上的位置。制表器使用数字地图来知道在哪里查找选票。如果椭圆形不在它们所属的地方，制表器将无法找到它们或误读它们。这个问题将导致制表器无法正确读取椭圆形，或者根本无法读取选票。这就是最有可能导致高拒绝率的原因，也是为什么

这么多选票最终不得不在抽屉中搁置的原因——这导致了另一组问题和许多延误。我们都知道拖延有利于欺诈。

MCTEC中心的选票表格设备与用于选举日投票的Dominion ICP制表器不同。这些扫描仪对缩水/倾斜的选票更宽容，并且能够由选举工作人员手动裁决。这可能就是为什么我们在处理邮寄或亲自投票的选票时没有看到同样的问题。显然，亚利桑那州为选举日做准备而进行的逻辑和准确性测试都不是现实世界的测试。而是使用原始的预印选票在场外专业印刷，并输入Dominion ICP制表器，以确保它们正常工作。然而真正的逻辑和准确性测试则使用按需选票打印机现场打印的选票。这将是一个真正的端到端测试，这最终会成为一个巨大的问题。

由于共和党支持者更有可能在选举日亲自投票，他们不成比例地受到选举官员无能的影响或剥夺了选举权。未能正确测试系统以了解更改选票大小的影响是一个致命的错误。这相当于对选民宪法权利的大规模侵犯，这需要法律的平等保护。这个问题没有影响倾向于民主党的邮寄选票。MCTEC中心使用更能够处理倾斜图像和手动裁决问题选票的设备，这些选票倾向于民主党的早期自投选票。

我们不知道这一切是否都是故意的。但设计不当的流程和未能在现实世界的条件下正确测试设备，导致亚利桑那州又一次第三世界选举。值得注意的是，手工计数丝毫不会受到扭曲的投票的影响。扔掉机器。

Yet, at the SAME time, CNN reporters and Sky News journalists are STRIPPED of accreditation for coming to liberated Kherson without permission, allegedly for "ignoring existing prohibitions without the consent of the relevant commanders," as the General Staff of the Ukrainian army says.
