Retracted coronavirus (COVID-19) papers

“We’ve been tracking retractions of papers about COVID-19 as part of our database. Here’s a running list, which will be updated as needed.”

<https://retractionwatch.com/retracted-coronavirus-covid-19-papers/>

On the Retracted list is a once popular Sweden study:

#209 “SARS–CoV–2 Spike Impairs DNA Damage Repair and Inhibits V(D)J Recombination In Vitro,” published in Viruses on October 13, 2021.

Also on the lists are 12 studies involving “ivermectin”.

要嘛？  
大幅提高保費！  
否則，  
刪減醫療支出！

請教版主清冠一號有治療新冠病毒的效果嗎？

清冠一號無法改變天擇，T cell immunity才能克服 "被天擇"。

Florida Surgeon General released an analysis on mRNA vaccines that shows an increased risk of cardiac related death among men 18-39, saying "We will not be silent on the truth."

Twitter already deleted the post

<https://t.me/scifiworld0/3527>

California just became the first state in the nation to mandate that all children take mRNA vaccines in order to attend school.

Florida, on the other hand, now recommends against the mRNA vaccines for males ages 18-39 years old.

Florida follows the science, California does not.

請問教授我於昨晚身體不適發燒  
趕緊服用N+E後  
並沒有喉嚨方面的問題 反而是肚子和胃部疼痛 也噁心想吐 也一直想上大號  
(但沒有成功)  
這是否說明病毒已進入腸胃  
我仍按照指示服完3天的藥即可  
需要再加表飛鳴之類的嗎  
謝謝您的回覆

你要去做檢查，照腹部X光、抽血、做超音波，也許是結腸憩室炎、膽囊發炎 或 闌尾炎，不是病毒感染。

請問教授：如果是因為2支AZ疫苗造成的傷害，導致食慾大開，這一年內已胖近10公斤，原本沒有脂肪肝的，現在變中度脂肪肝，還能透過不斷運動恢復體重及脂肪肝問題嗎？  
還是破壞大於運動減重，覆水難收了？

體重增加可經由運動與飲食來恢復。你該擔心的不是體重增加，而是疫苗已促使你的血管壁及全身器官累積PrLP aggregate--->Amyloid。

類澱粉沉積難道完全無法被分解或改善嗎？還是因為會持續不斷累積，累積的量大於能分解掉的量，最後勢必造成重要器官衰竭呢？  
謝謝您的指導~

類澱粉沉積完全無法被分解或改善，且會持續不斷擴大累積，最後勢必造成重要器官衰竭。
